The Four Factors of Risk - American Management Association There are four main factors that contribute to the perception of risk in the mind and heart of the customer. 1. The size of the sale. The larger the sale, the more money involved, the greater the risk. If a person is buying a package of Lifesavers, the risk of satisfaction or dissatisfaction is insignificant. Risk Factors for Cancer - National Cancer Institute (There are also factors that are linked to a lower risk of cancer. These are sometimes called protective risk factors, or just protective factors.) Cancer risk factors include exposure to chemicals or other substances, as well as certain behaviors. They also include things people cannot control, like age and family history. A family history of certain cancers can be a sign of a possible inherited cancer syndrome. What Are the Risk Factors for Heart Disease?, HHS, NIH, NHLBI Each risk factor greatly increases a woman's chance of developing heart disease. But having more than one risk factor is especially serious, because risk factors tend to "gang up" and worsen each other's effects.

Dementia: 4 Risk Factors Associated With The Disease 4. Sleep. Those who experienced less sleep at mid-life may also be more likely to develop dementia. A study from 2017 found that people took longer than 90 minutes to enter REM (the fifth stage of sleep) were at high risk for developing dementia. 4 Top Risk Factors Associated with Dementia The top four prominent life-related risk factors are listed below: 1. Age. Not surprisingly, age is considered the most significant risk factors for this disease, which rarely affects those under. 4 Critical Risk Factors in Selling - Brian Tracy There are four main risk factors that contribute to the perception of risk in the mind of the customer. Risk Factor 1: Size of the Sale. The first risk factors that contribute to risk is the size of the sale. The larger the scale, the more money involved, the greater the risk.
