Fractal Facts for Kids - Kiddle encyclopedia There are many types of fractals, made in a large variety of ways. One example is the Sierpinski triangle, where there are an infinite number of small triangles inside the large one. Another example is the Mandelbrot set, named for Benoît Mandelbrot. Fractal Facts for Kids | KidzSearch.com A fractal is any equation or pattern, that when seen as an image, produces a picture, which can be zoomed into infinity and will still produce the same picture. It can be cut into parts which look quite like a smaller version of the set that was started with. Fractals Lesson for Kids | Study.com A fractal is a never-ending pattern. The Sierpinski Triangle has patterns with triangles repeating themselves. You can see fractals in nature by looking at ferns or a picture of the planet Saturn.
