FRACTIONAL FACTORIAL PLANS - IASRI Fractional Factorial Plans II-263 combinations of two or more factorial effects are estimated by an observational contrast. All factorial effects that appear in the expectation of an observational contrast are said to be aliased with each other. Fractional factorial design - Wikipedia Notation. Fractional designs are expressed using the notation $l k \hat{p}$, where l is the number of levels of each factor investigated, k is the number of factors investigated, and p describes the size of the fraction of the full factorial used. Formally, p is the number of generators, assignments as to which effects or interactions are confounded, i.e., cannot be estimated independently of each.
